LOGLINE

After a lab explosion catapults them to the year 2100, two brilliant scientists find themselves in a post-apocalyptic world ravaged by alien invaders. Teaming up with a group of survivors, they must use their knowledge and futuristic technology to devise a plan to disrupt the alien's energy cores and save humanity from annihilation.

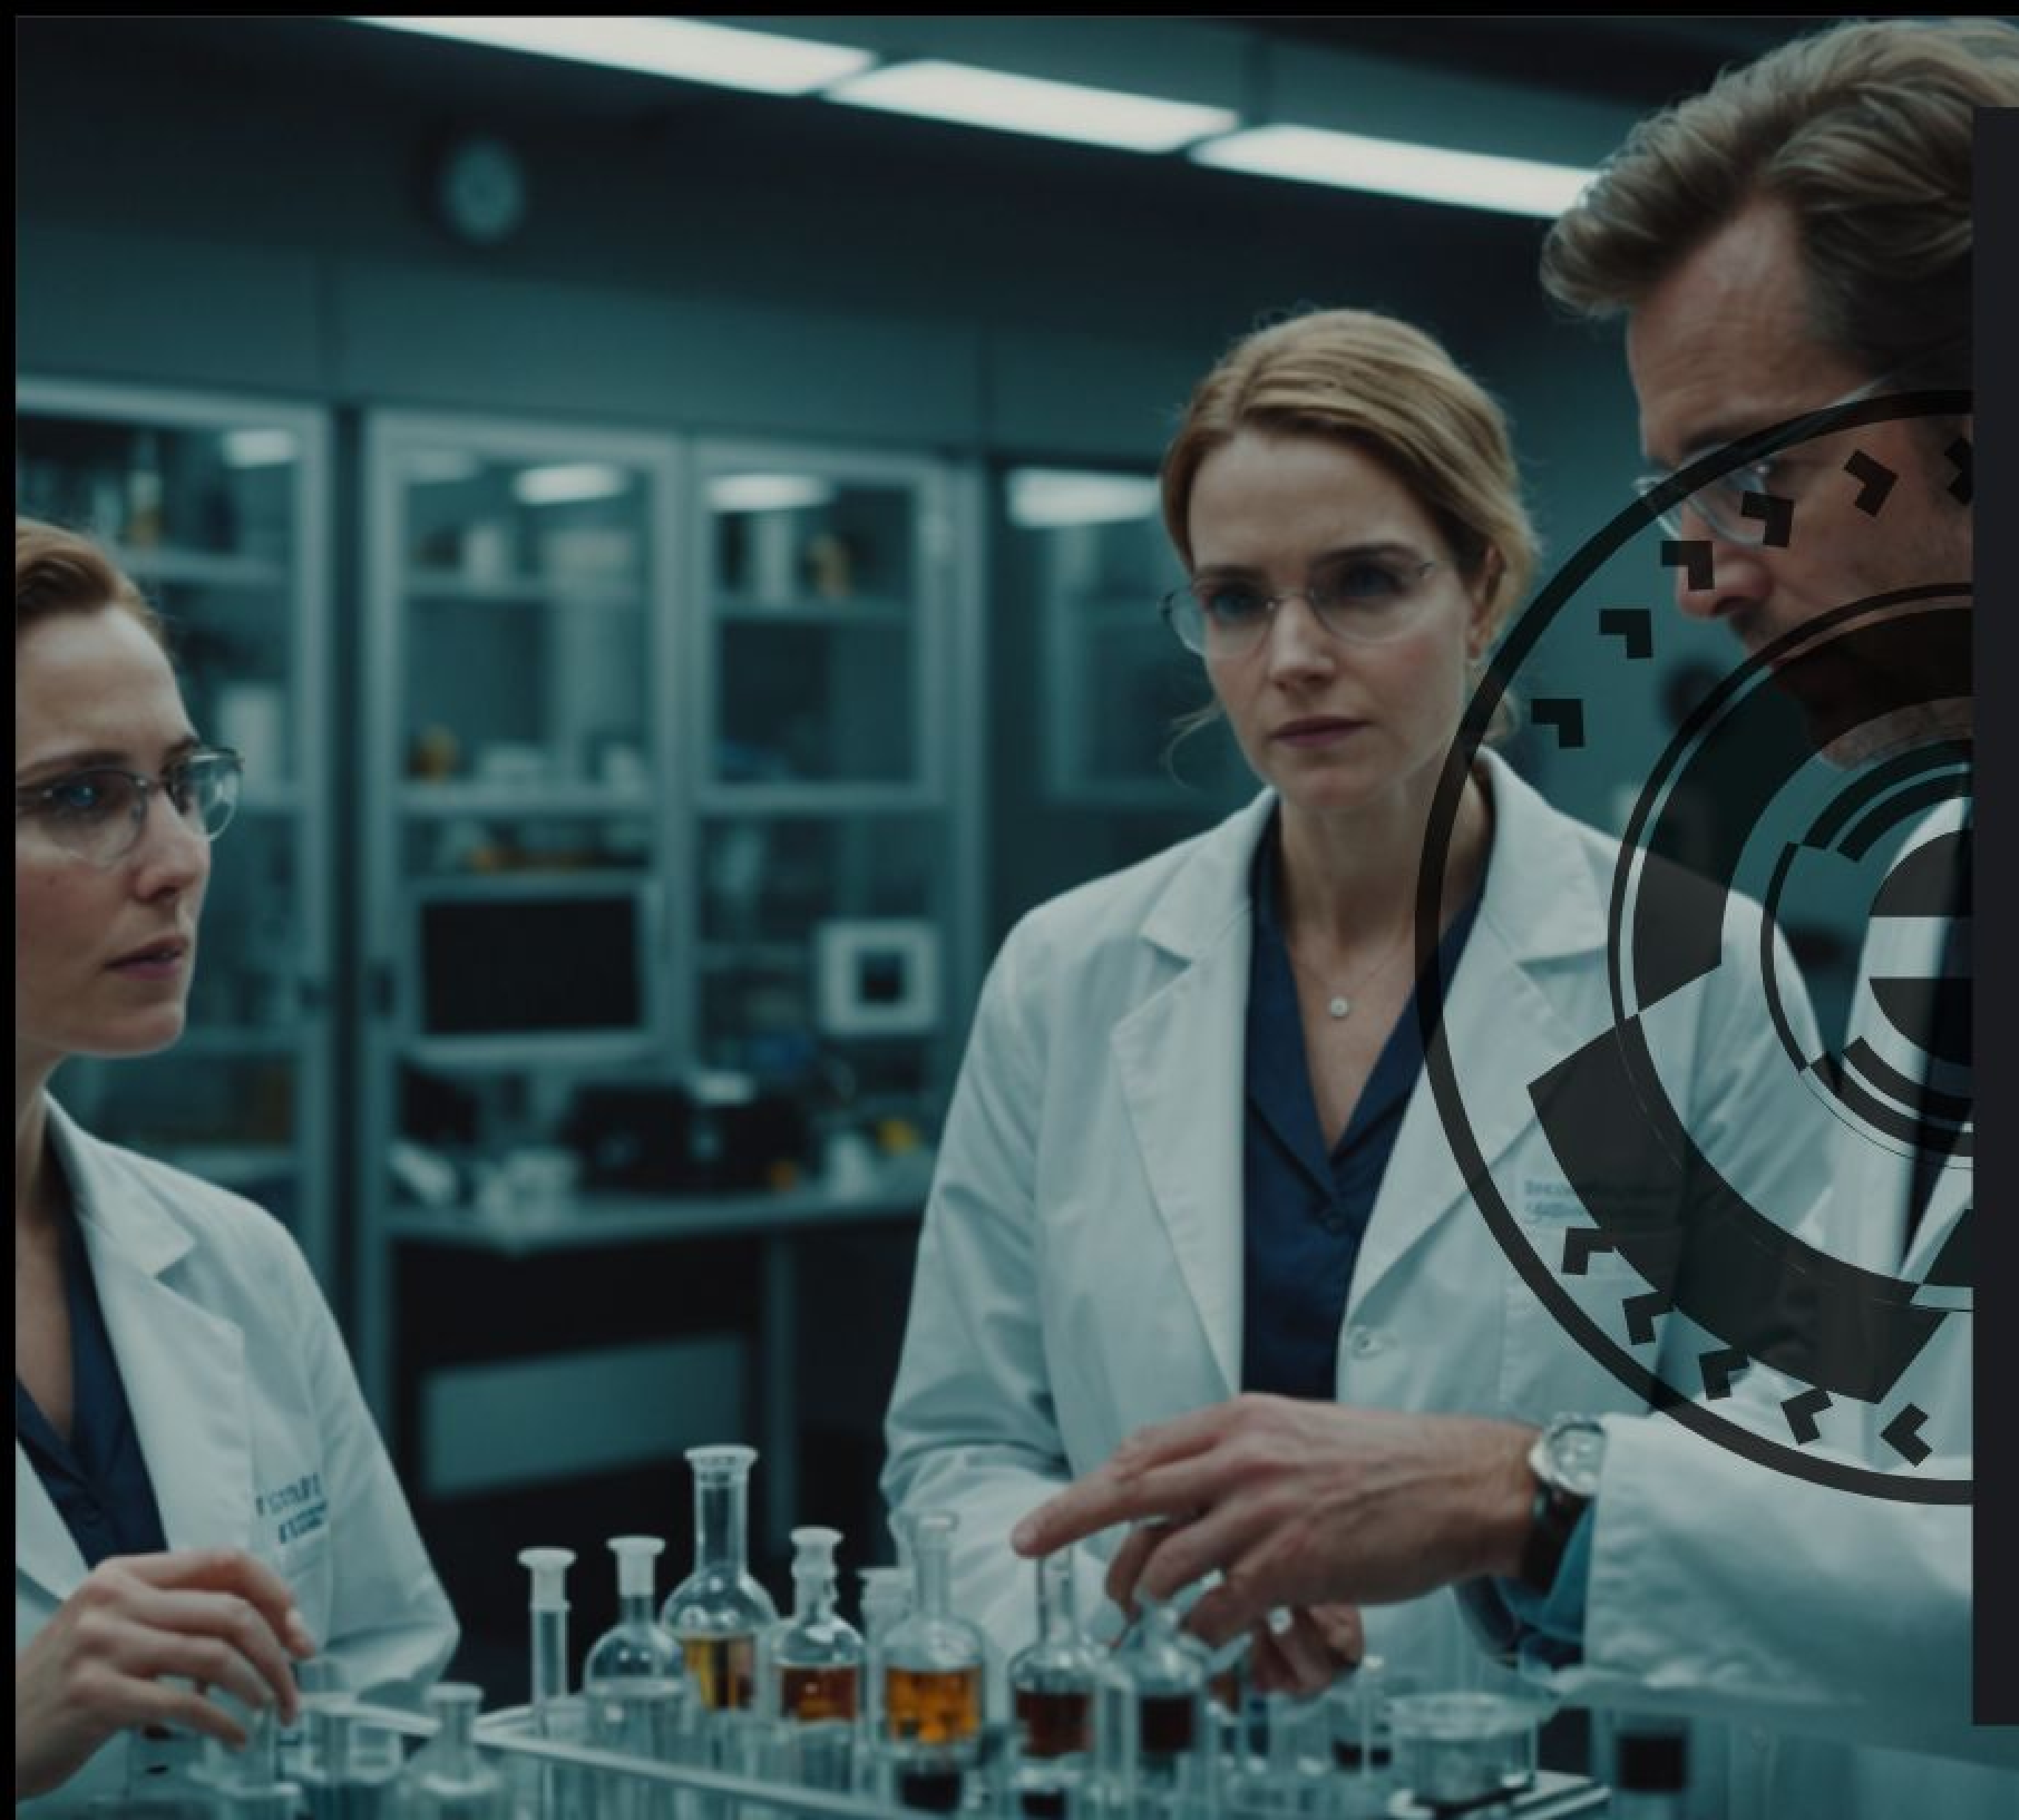

SYNOPSIS

****Invasion from the Future**** ****Synopsis:**** In the year 2023, DR. LAURA CARTER, a brilliant scientist, and her partner, DR. ROBERT HUGHES, are on the brink of a groundbreaking discovery in their futuristic lab. They are developing a new compound that could revolutionize energy resources. However, during a critical experiment, an unexpected error leads to a catastrophic explosion. The explosion transports Dr. Carter and Dr. Hughes to the year 2100, where they awaken amidst the ruins of their lab. Dazed and disoriented, they quickly realize that they are no longer in their own time. The once-familiar cityscape is now a desolate wasteland, littered with the remnants of advanced technology and under the ominous glow of alien ships patrolling the skies. As they navigate the devastated city, they encounter scenes of chaos and destruction. Alien ships zoom past, firing lasers, and the scientists narrowly escape death by ducking for cover. Amidst the ruins, they witness humans in high-tech armor engaged in a desperate battle against the alien invaders. A wounded soldier informs them that the year is 2100 and urges them to flee to safety. Seeking refuge, Dr. Carter and Dr. Hughes are led by a group of survivors to a hidden underground safehouse. There, they meet ALEXIS, a tough-as-nails commander who briefs them on the dire situation. The aliens arrived a decade ago, and humanity has been fighting a losing battle ever since. Realizing the potential value of the scientists' knowledge, Alexis implores them to help save humanity. Determined to make a difference, Dr. Carter and Dr. Hughes suit up in advanced tech-armor and join the resistance. They provide crucial insights into the aliens' weaknesses, particularly their energy cores. A plan begins to take shape, centered around disrupting these cores to cripple the alien forces.

THE WORLD

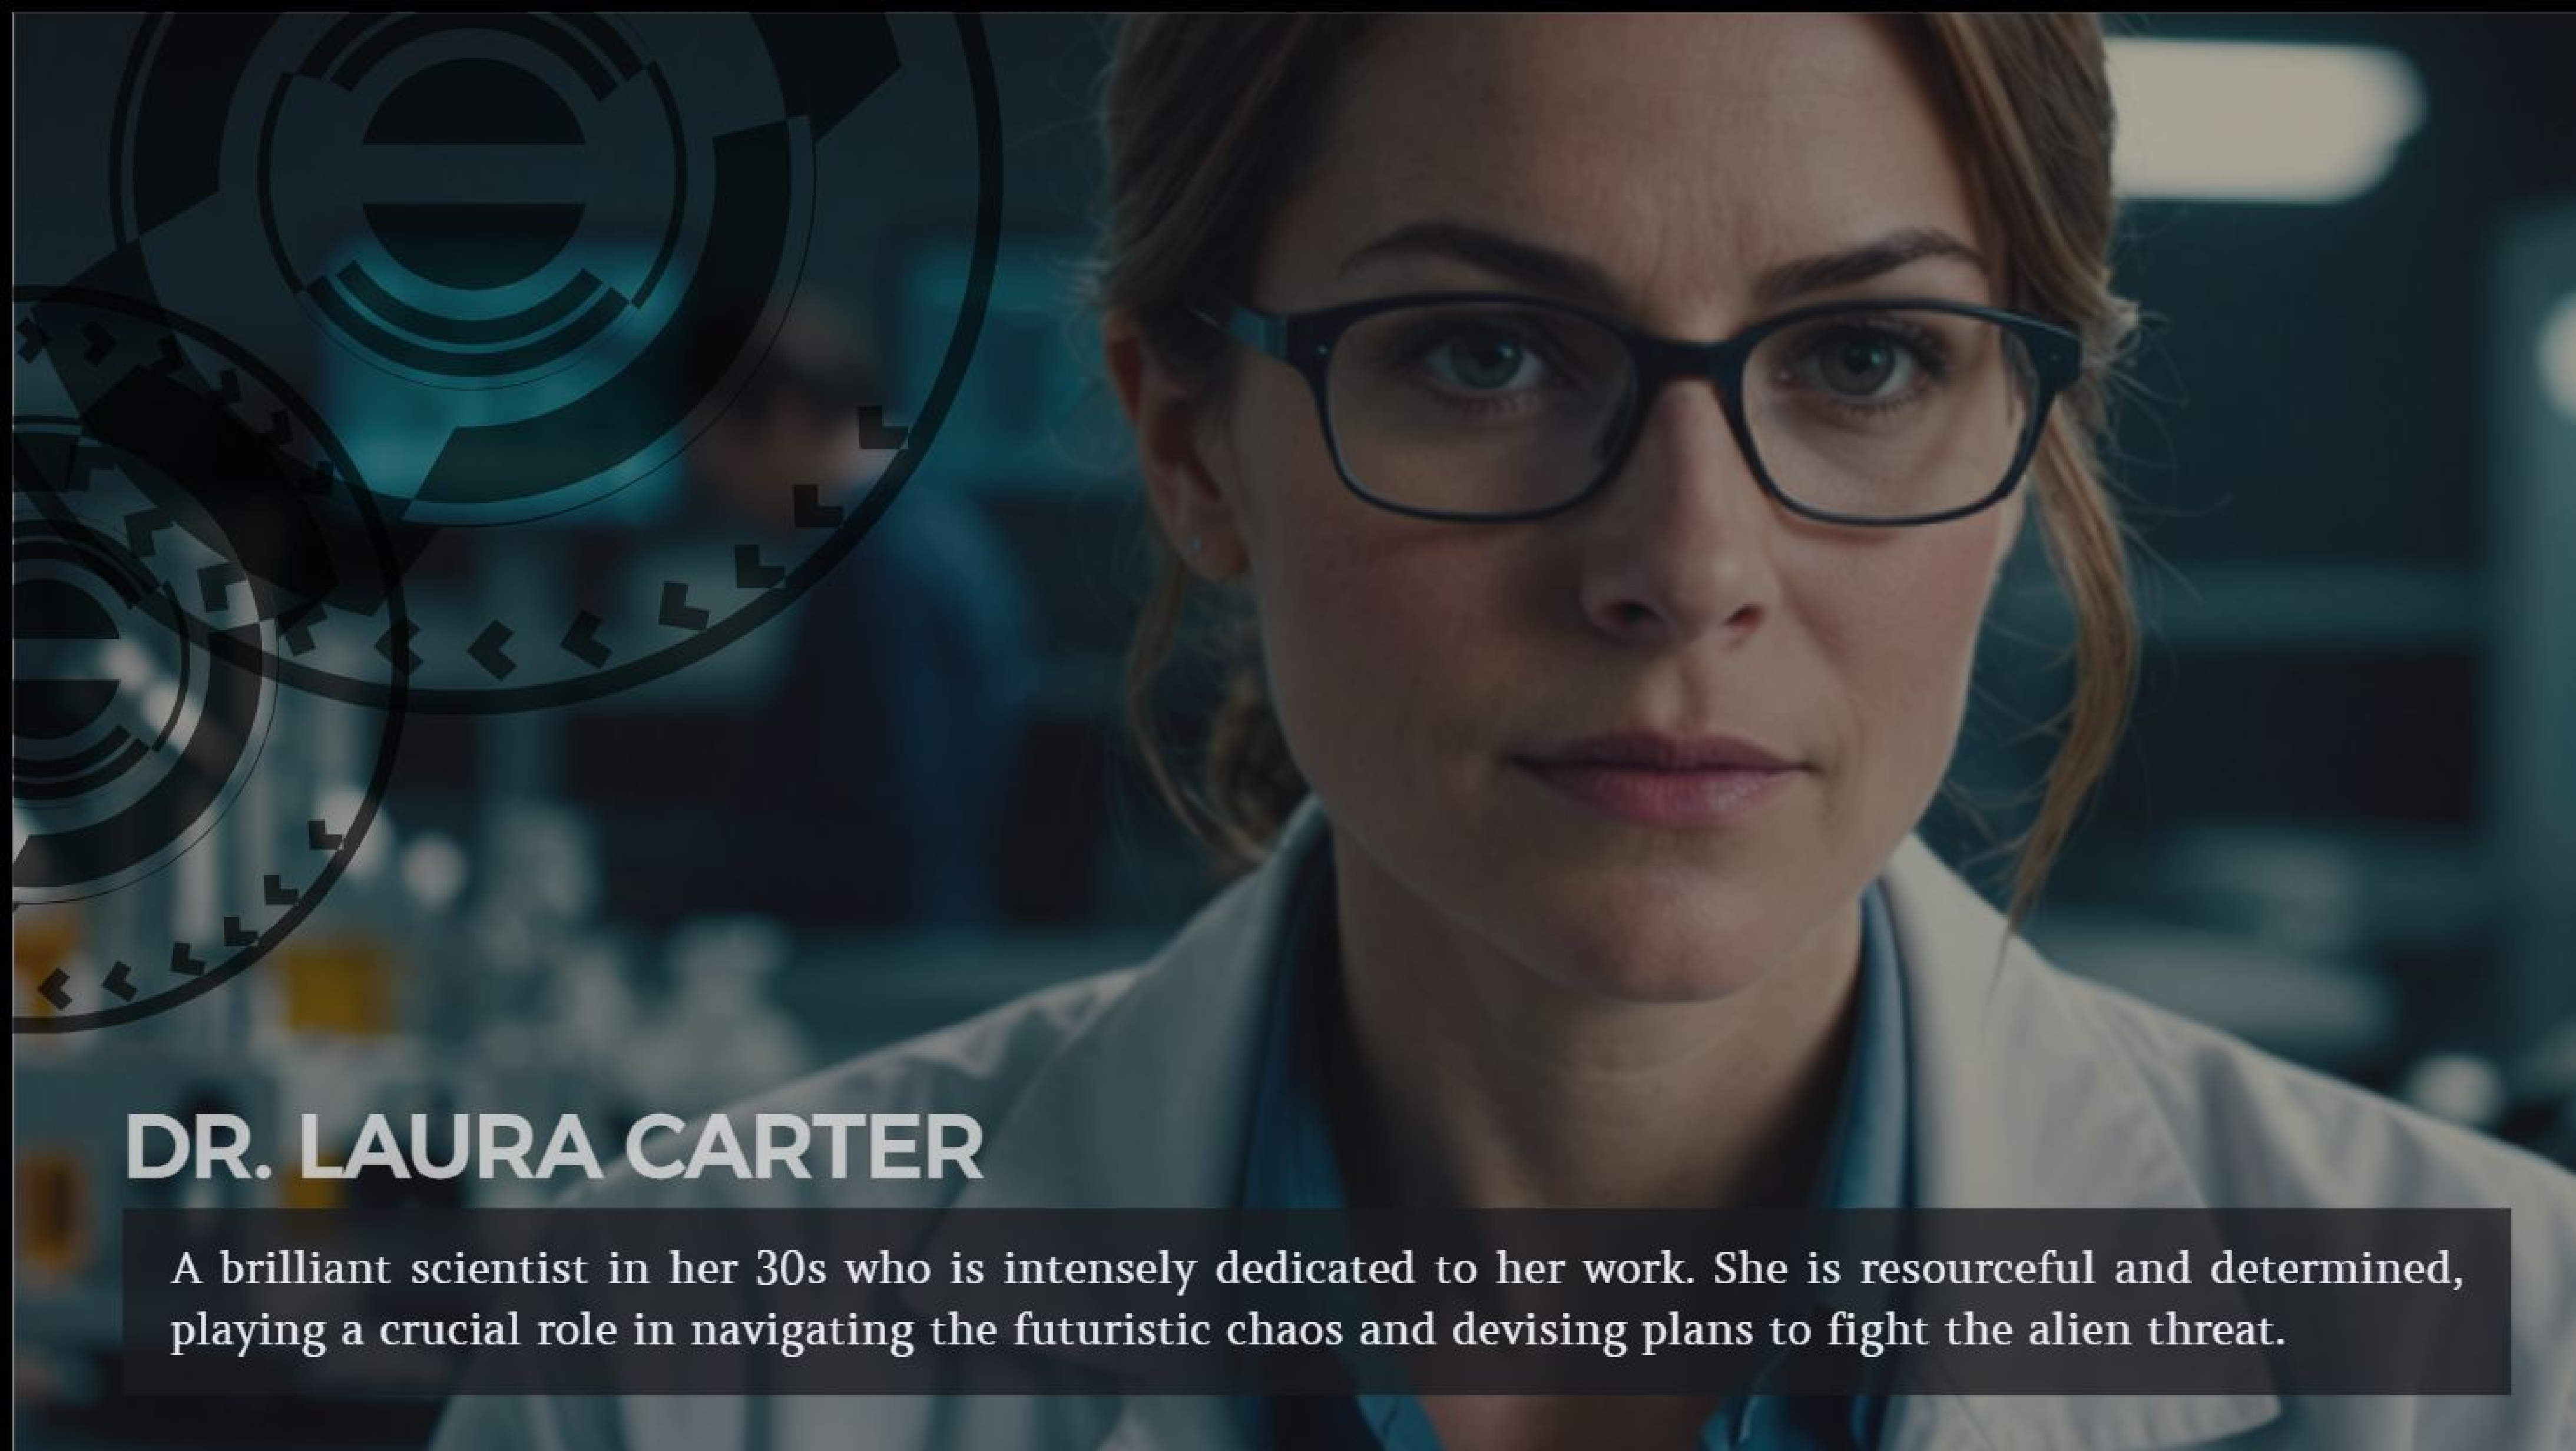

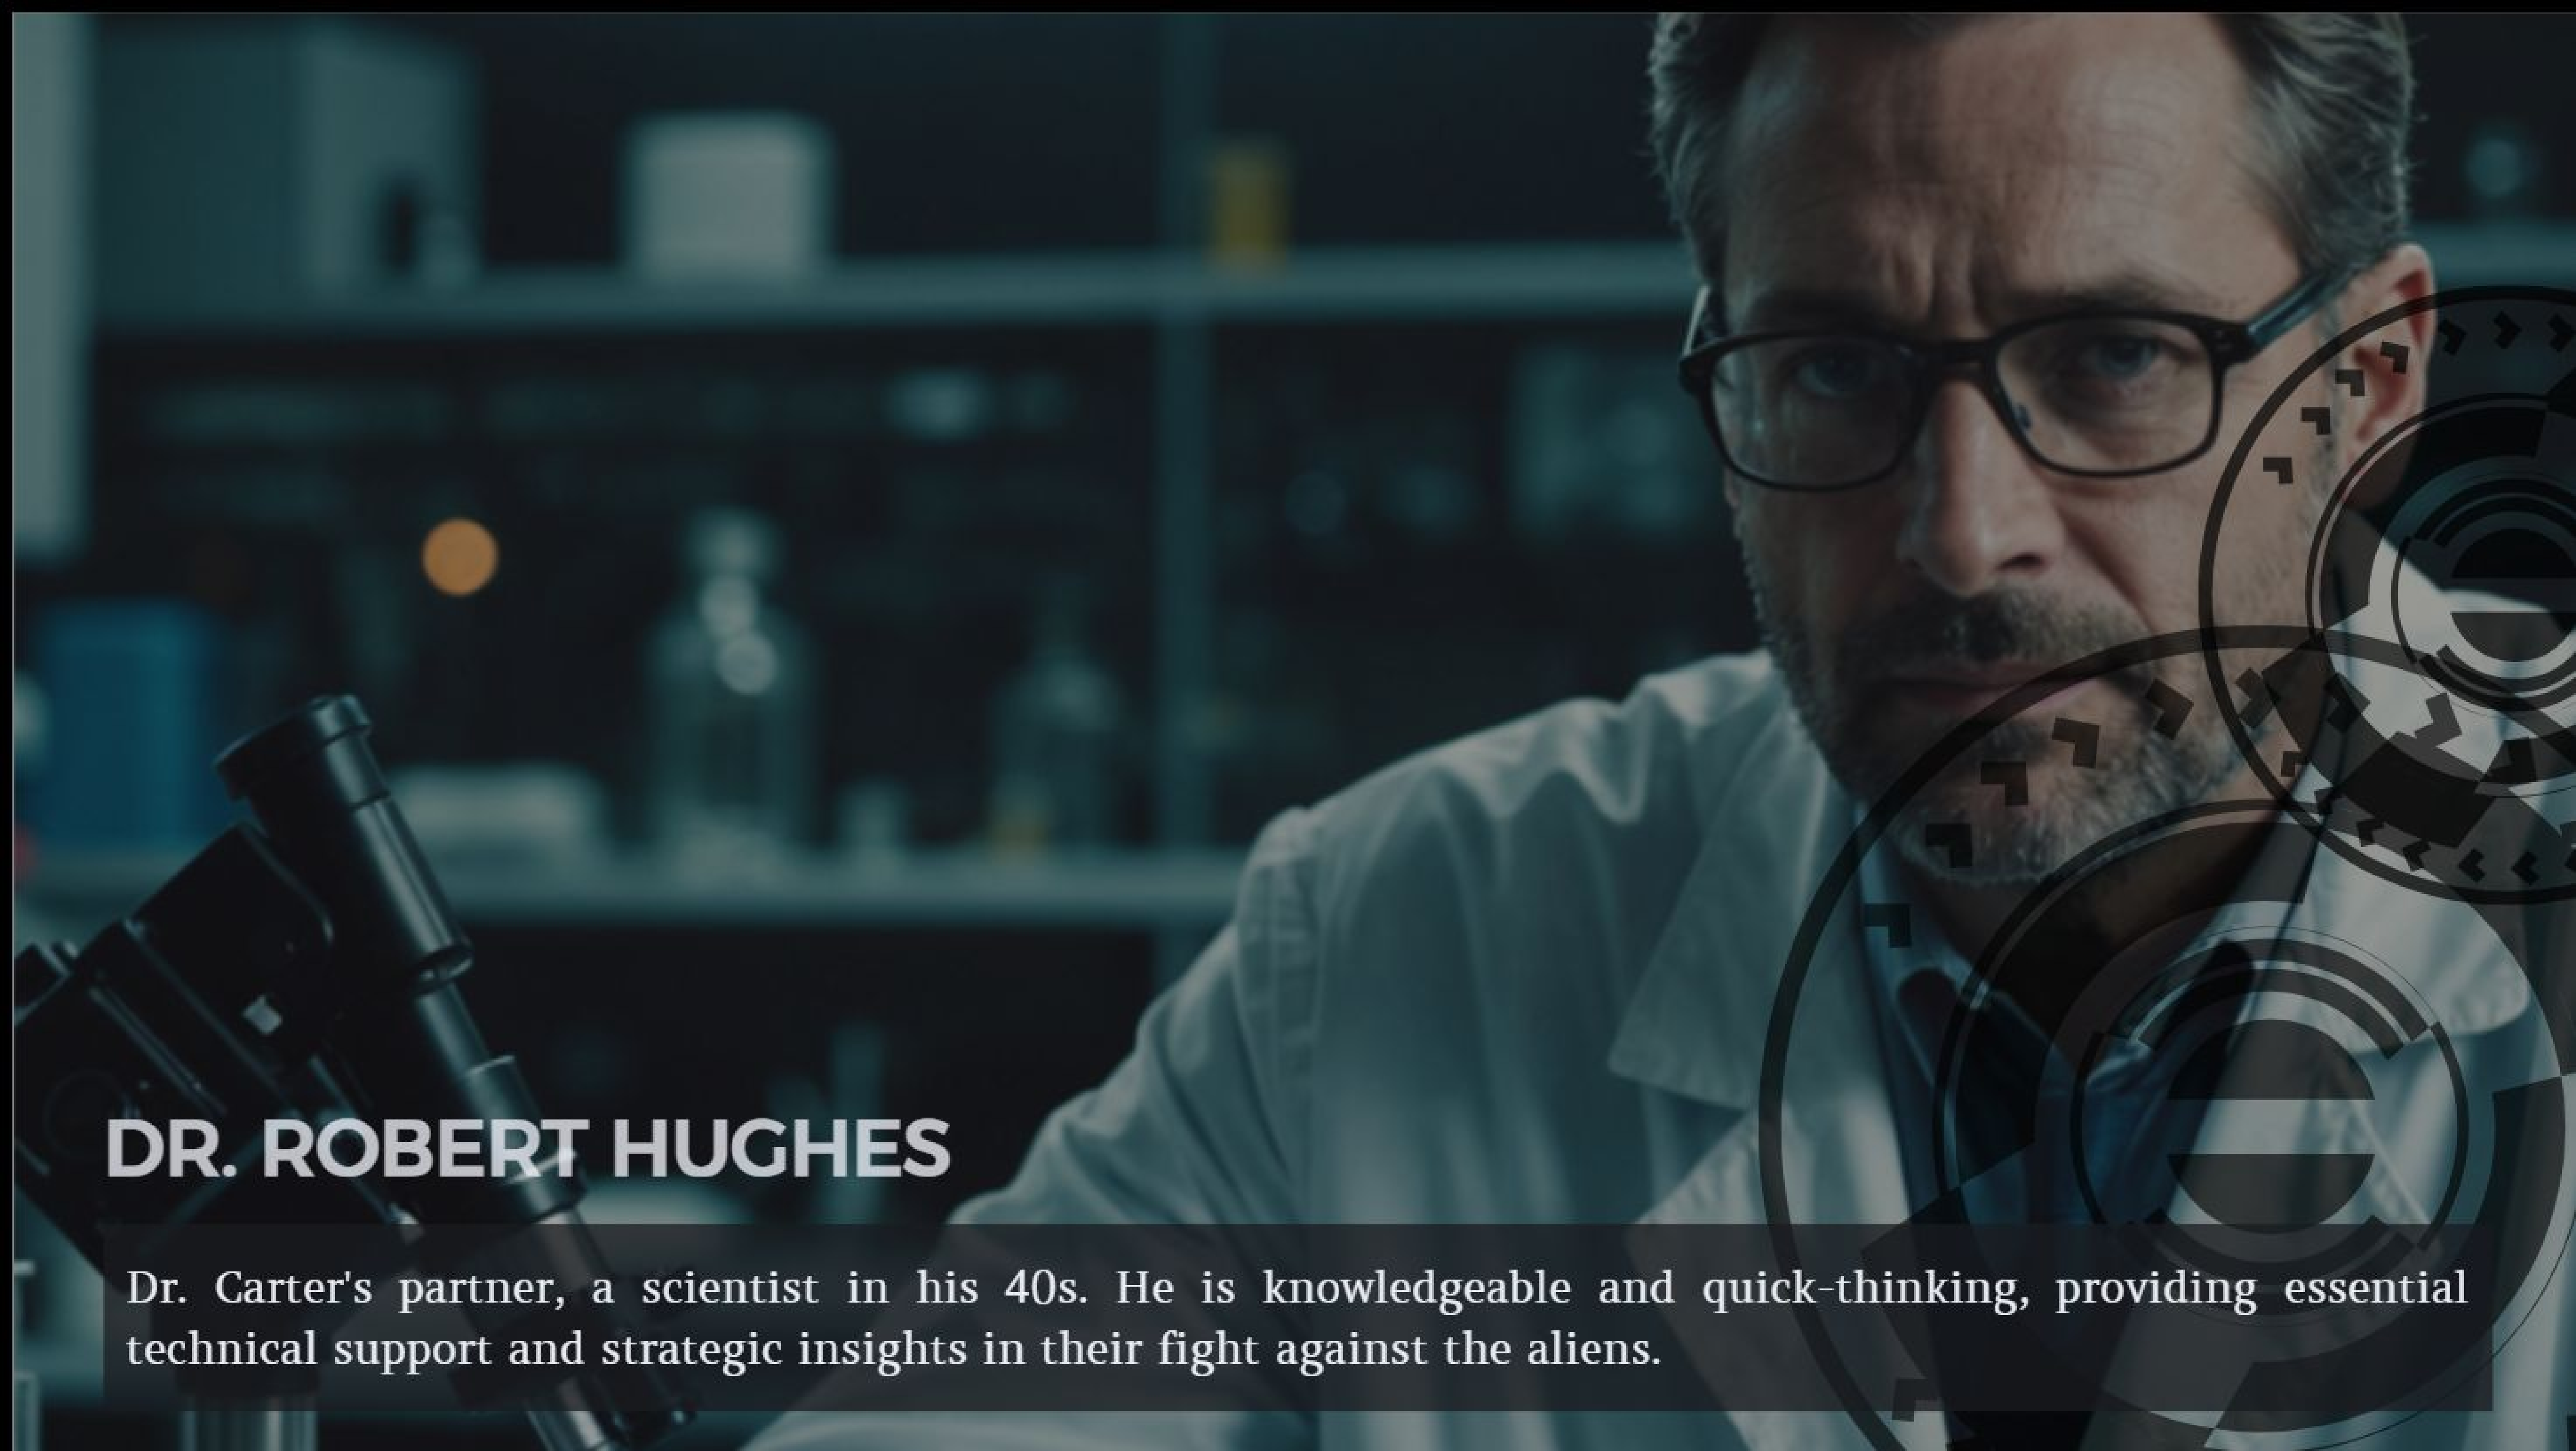

THE CHARACTERS

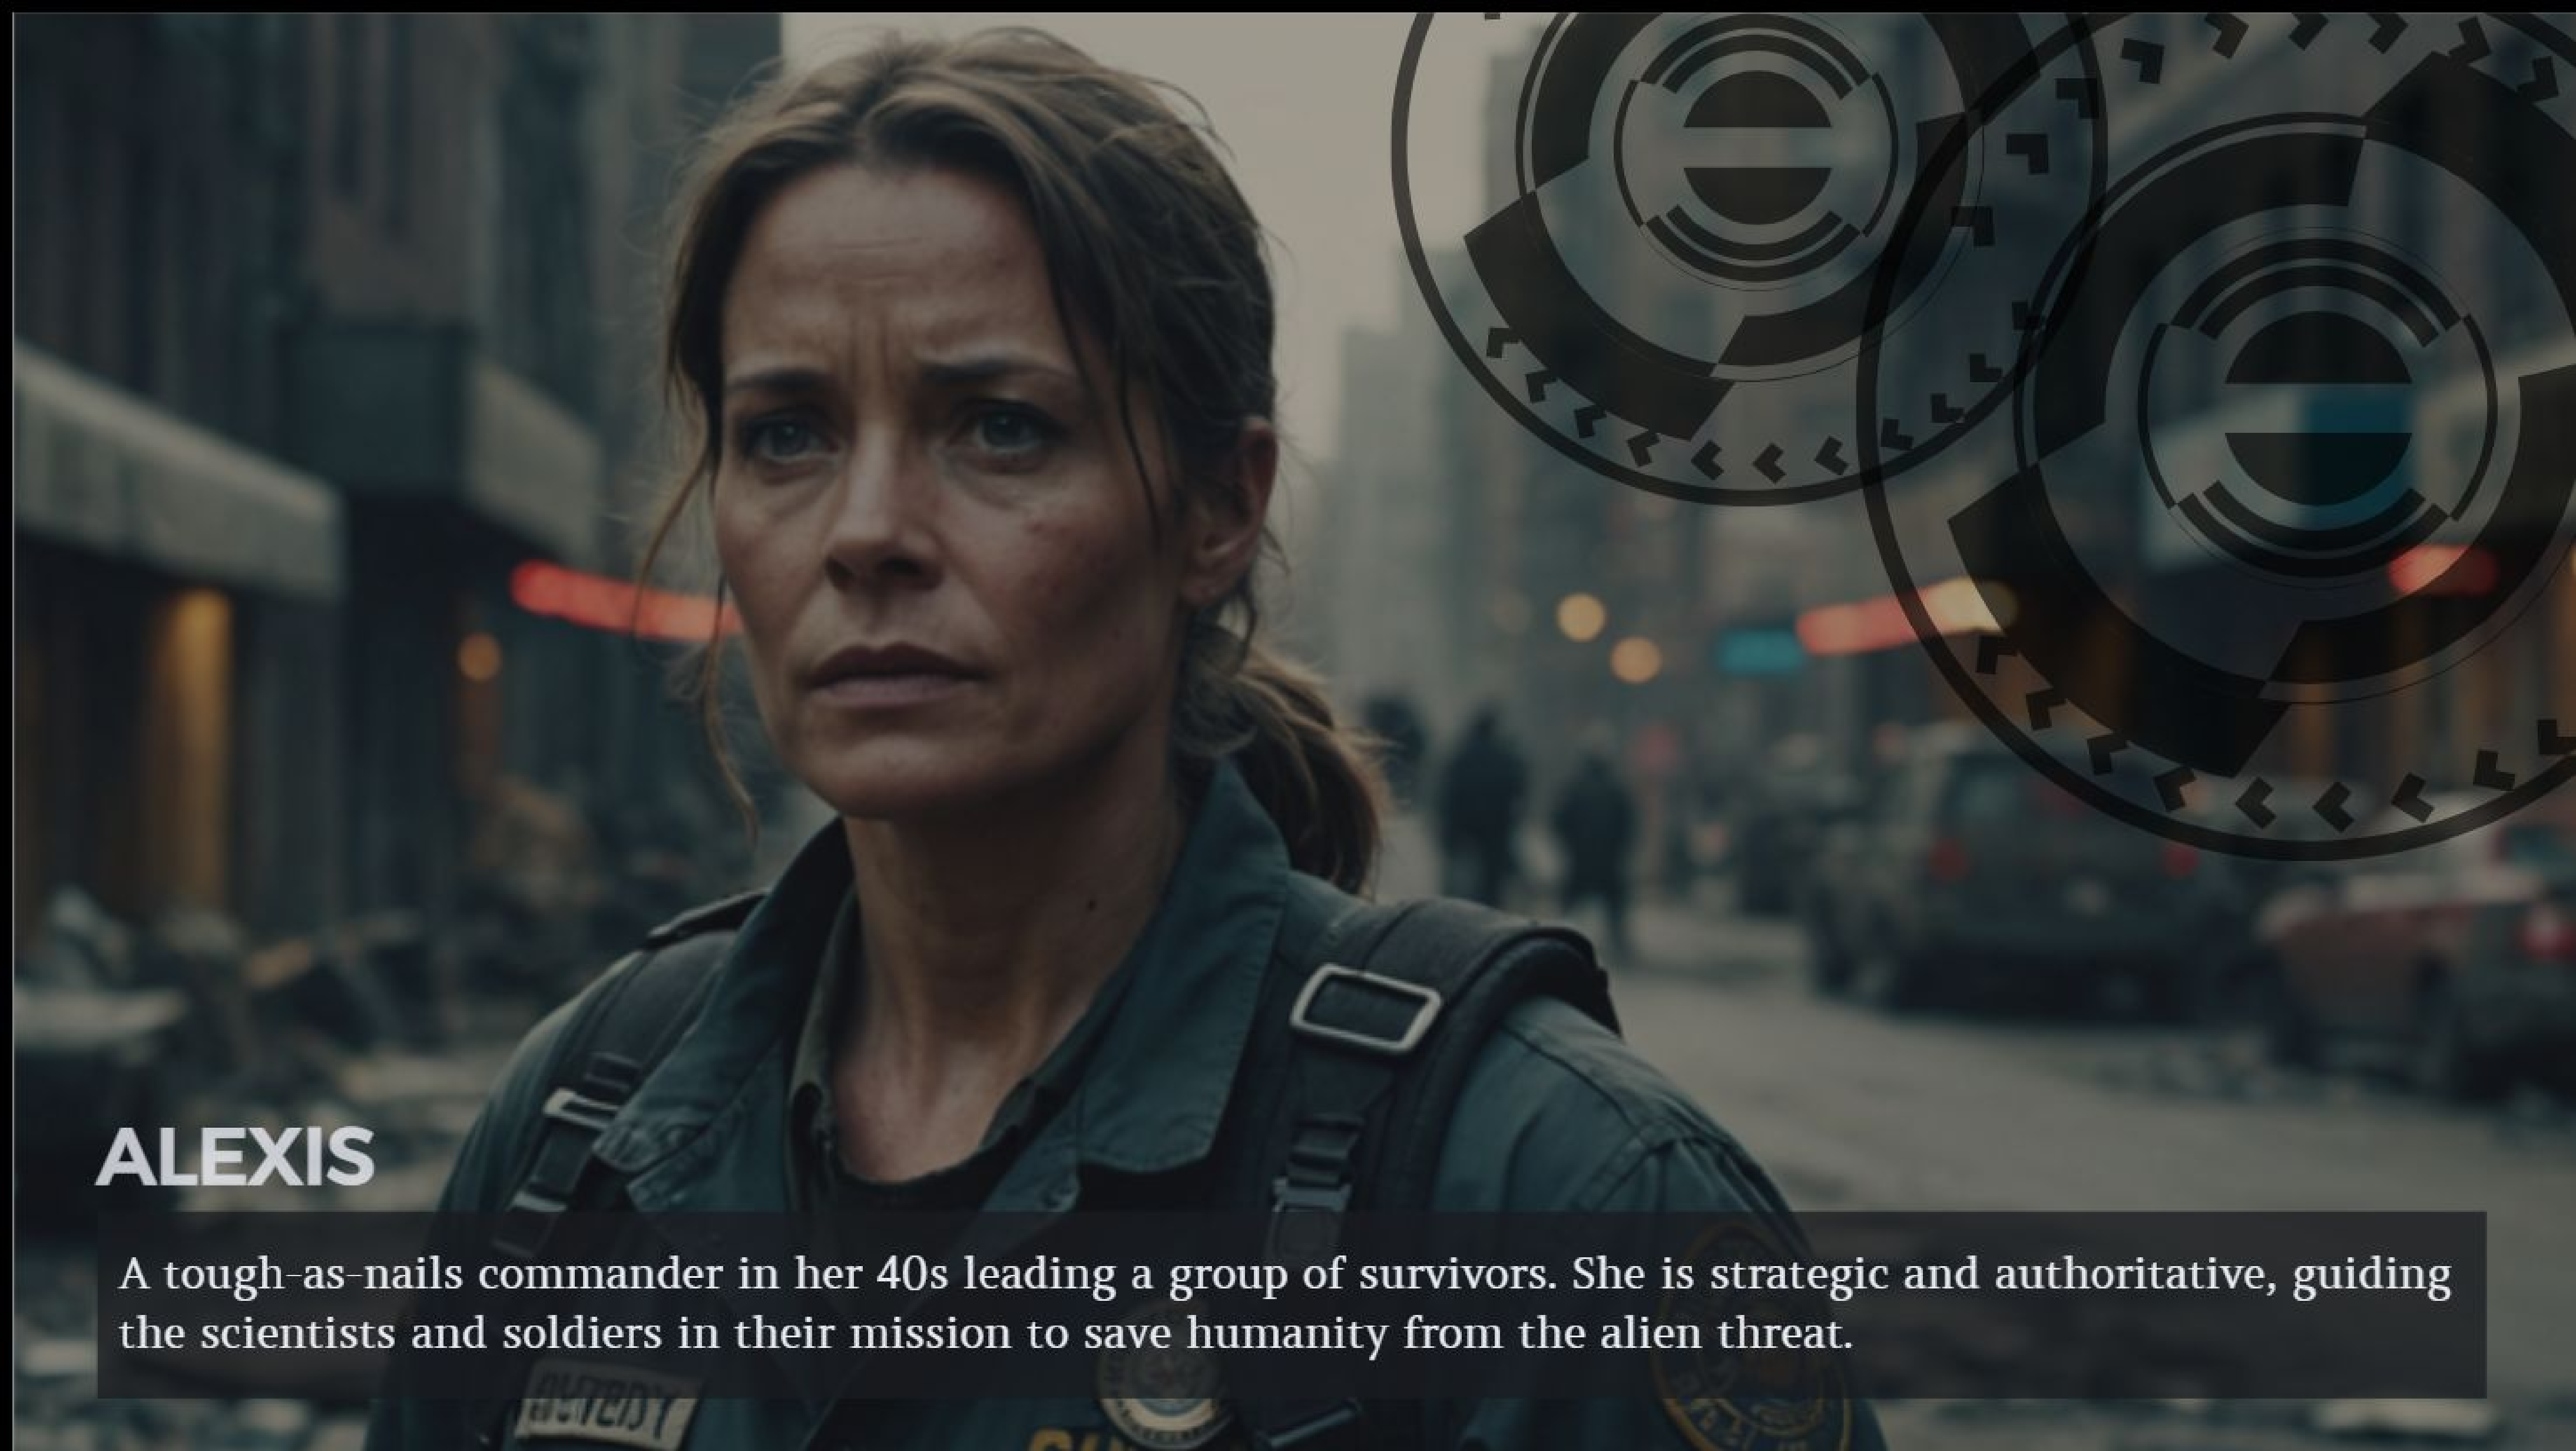

DR. LAURA CARTER

A brilliant scientist in her 30s who is intensely dedicated to her work. She is resourceful and determined, playing a crucial role in navigating the futuristic chaos and devising plans to fight the alien threat.

A man with glasses and a light beard, wearing a white lab coat, is looking through a microscope. The background is a blurred laboratory with shelves of equipment. On the right side of the image, there is a large, stylized graphic of interlocking gears.

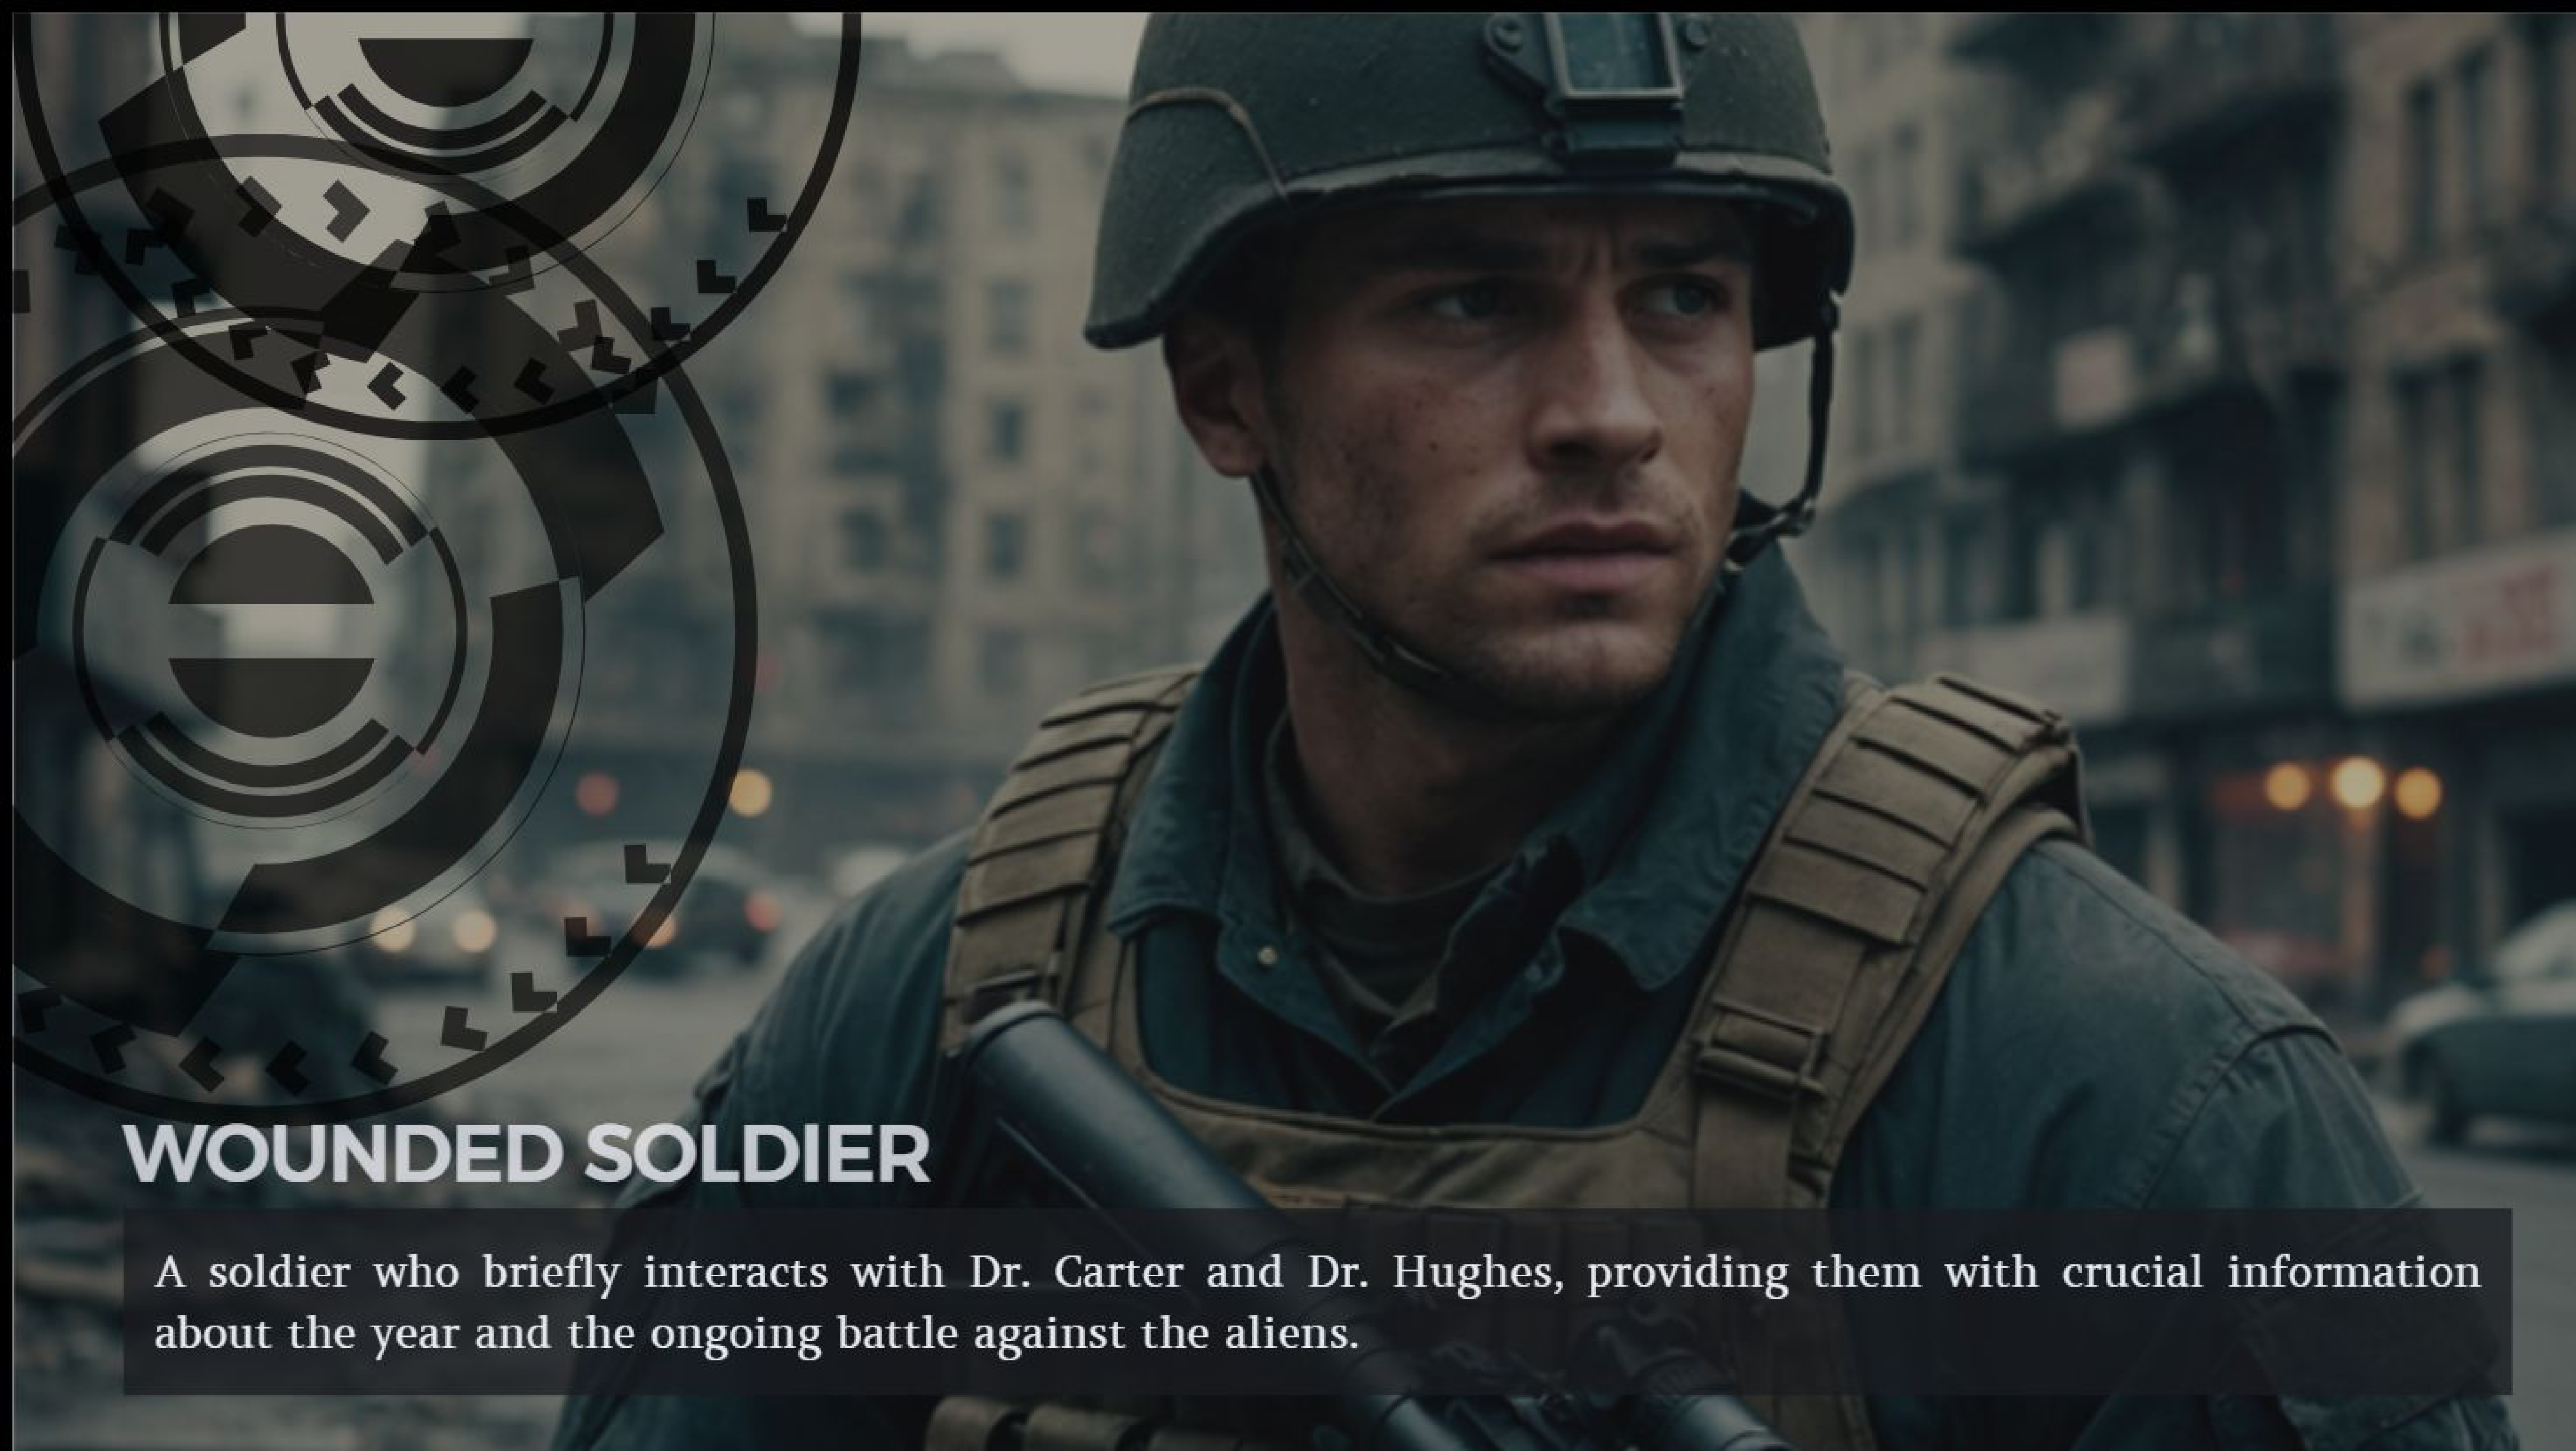

DR. ROBERT HUGHES

Dr. Carter's partner, a scientist in his 40s. He is knowledgeable and quick-thinking, providing essential technical support and strategic insights in their fight against the aliens.

A woman with brown hair tied back, wearing a dark green military-style jacket with straps and buckles. She has a serious expression and is looking slightly off-camera. The background is a blurred, futuristic city street with tall buildings and some red light streaks. In the top right corner, there are two large, semi-transparent mechanical gear overlays with a stylized 'E' or 'G' shape in the center.

ALEXIS

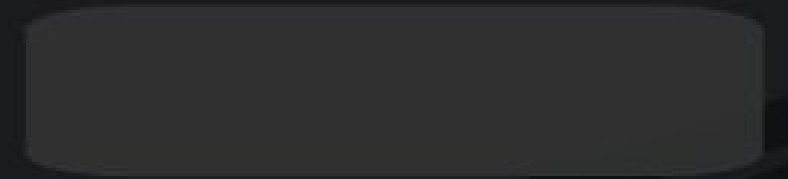

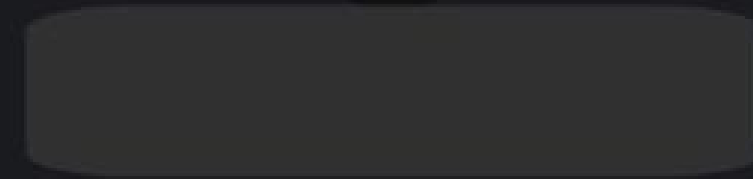

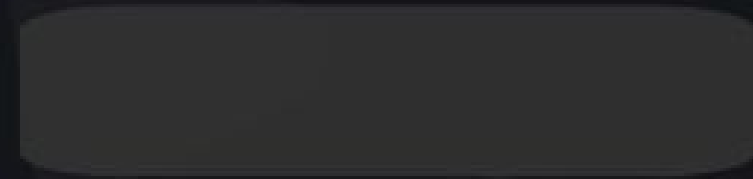

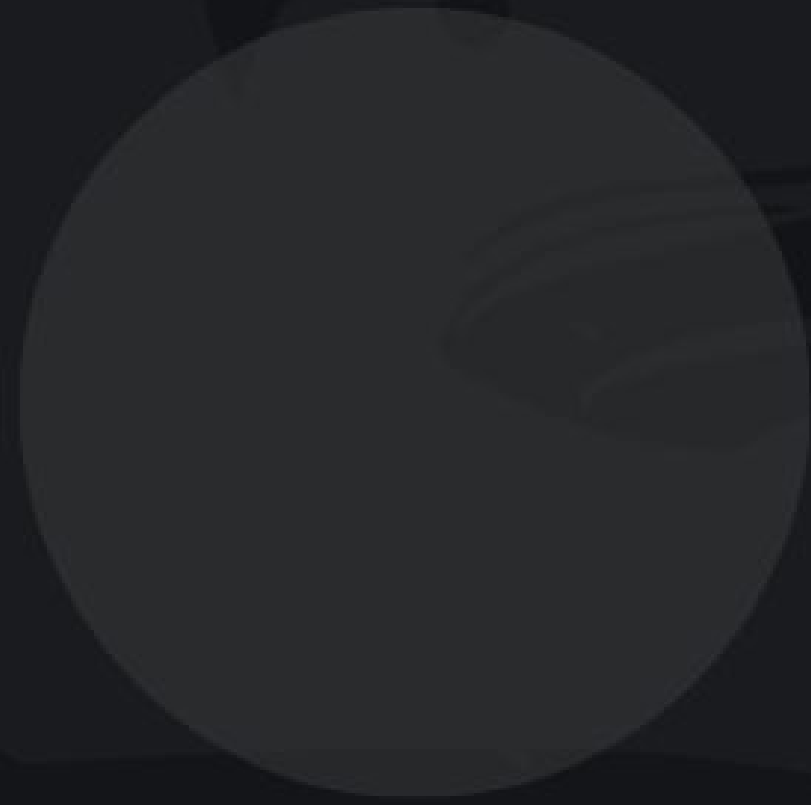

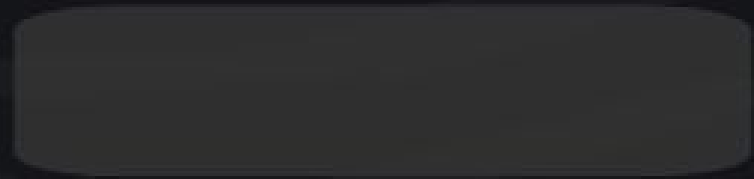

A tough-as-nails commander in her 40s leading a group of survivors. She is strategic and authoritative, guiding the scientists and soldiers in their mission to save humanity from the alien threat.

WOUNDED SOLDIER

A soldier who briefly interacts with Dr. Carter and Dr. Hughes, providing them with crucial information about the year and the ongoing battle against the aliens.
